

**1 December 2023**

## Issues Under Review:

- The ability for an unregistered Co-driver to be entered in an event by the Primary Driver. This was stopped and resolved during the Documentation but should have been stopped earlier.
- Some offline functions are currently not working consistently for some Clubs.
- Licence renewal notifications are not being received by all licence holders once the ability to renew the licence is available.

## Work In Progress:

- The ability for some competitors to be able to adjust the number of entries and therefore zero out the entry fee on an event entry. This is getting resolved at Documentation, but a solution is being worked on to remove this bug.
- The ability to provide attachments to the Entry Email database. Currently, this can only be done by uploading the document to the MotorSport Online Club document area and then hyperlinking it to the email.
- Improved access levels for Clerk of the Courses to provide for better visibility, particularly at ClubSport level events.
- Adjustments are being made to the content of some of the automated confirmation emails produced by the system.
- Inclusion of both the Region and the Supplementary Regulations on the Event Card in the MotorSport New Zealand calendar to provide more information without having to start the entry or Expression of Interest process.
- Improvements to the downloadable Entry list available to the Club to provide more data such as individual vehicle details, cleaner transponder number information, competition licence number and expiry date along with club membership information.
