

10 January 2024

Several issues have been fixed and were released on 10 January 2024 in response to the 2024 roll over:

- Digital Licence display error fixed: The issue where digital licence of a competitor was not displaying correctly, or blank has now been fixed.
 - Officials missing from Permit Application lookup fixed: An issue where some officials were missing in the major officials look up section of the permit application has now been fixed.
 - Valid Club Membership / Licence not recognised: The issue where a valid club membership or competitor licence was not recognized by the platform has now been fixed.
 - Unable to renew Licence and Club Membership fixed: An issue where an error message display when trying to renew a licence or club membership was fixed
-

In addition, we have also deployed the following updates recently:

- Ability for competitor to set entry fee to \$0 fixed: A small issue allowed competitors to set their entry fee to \$0 when they clicked a small, specific part of the entry form has been fixed.
 - Double charging of Driver & Co-driver fixed: An issue that charged both driver and co-driver has been fixed. Only the primary driver will be charged when entering an event. Organisers should take note of this and set fees accordingly if additional competitors on the same entry are to be charged.
 - Clearer grouping of co-driver / additional drivers in entry list: Where an entry has a co-driver, additional driver or navigator attached to it, the additional person will be clearly grouped and displayed alongside the primary driver.
 - Personal details removed from email notifications: Due to privacy concerns, all form information and personal details have been removed from the confirmation/notification emails that are sent from MotorSport Online. These emails will still contain links to access the information when logged into MotorSport Online.
-

The following updates and improvements are also set to be released in the coming weeks and months:

- **Make Supplementary Regulations accessible on calendar:** The Supplementary Regulations for an event will become accessible on the event's card on the calendar. This means that users will no longer required to click 'enter' to see this document.
 - **Improve the location information on event calendar:** Improve the location information on an event's card on the calendar to display specific location with link to address on Google Maps.
 - **Fix issue where Licence Renewal Reminders were not being sent to some users**
 - **New, customised Entry List CSV export:** A new customised CSV export of Entry Lists has been developed, thanks to the help of a number of organisers, that displays more information such as licence number, grade and expiry as well as membership details and clearer vehicle data in separate columns.
-
