Fitness Appraisal- M Grade Applications (if you are applying for a C and/or R Grade please refer to the next section)

This is to be completed by a Physical Fitness Trainer/Secondary College Physical Education Teacher.

A competitor in a motorsport event does require a certain level of physical fitness prowess to control a motor vehicle in a competitive sport.

Research both internationally and nationally indicates that to achieve this, a person requires;

- Good quads – for the strength required to maintain heavy braking pressures.
- Good cardiovascular performance – similar to that of competitive runners and cyclists of similar ages.
- Hand and arm strength – for controlling the steering wheel at competition race speeds, and
- Handling temperature as the inside of a race car is generally similar to a hot day in desert like conditions.

Obviously, a lot of these attributes will build up as age and competitive training ensures. So, for the basic start point we are looking for a 12 to 16 year old to be able to score at least Level 5.0 on the standard Beep Test. We understand that not all will, due to an injury or physical attributes, find a Beep Test possible so the way is clear to appraise these persons with a similar rate of overall fitness from (for example) a bike or rowing machine test. (For details of the beep test go to <http://www.thebeepetest.com>). It is also understood that this appraisal is just that as the ultimate responsibility always remains with that of the applicant to demonstrate their ability to control a motor vehicle at speed.

- ☐ Completed a Beep Test with the following results:
- ☐ Undertaken the following alternative test which in my opinion demonstrates a similar level of fitness:
